

## ***Ancient TL Index 1984-1993***

---

### **Volume 2, 1984**

#### **Number 1**

- Non-linear growth: allowance for alpha particle contribution  
*M.J. Aitken* .... 2
- A new proposal for the expression of alpha efficiency in TL dating  
*S.G.E. Bowman & D.J. Huntley* .... 6

#### **Number 2**

- TL behaviour of some limestone rocks  
*G.W. Berger & H. Marshall* .... 1
- Rapid thick source alpha counting  
*M.L. Readhead* .... 7
- Unusual features of the thermoluminescence signal profile for sediments  
from beneath Lake George, NSW  
*A.J. Mortlock & D.M. Price* .... 10
- A cautionary note on the measurement of quartz TL immediately after irradiation  
*B.W. Smith & J.R. Prescott* .... 14

### **Volume 3, 1985**

#### **Number 1**

- Comments of TL age underestimates of stalagmitic calcite  
*K.S.V. Nambi* .... 5
- Thermoluminescence dating of loess deposition in Normandy  
*N.C. Debenham* .... 9
- A.G. Wintle* .... 11
- Vagn Mejdahl* .... 14
- Comment on *Rapid thick source alpha counting*  
*A.G. Wintle* .... 18
- A note on the temperature dependence of analaous fading  
*D.J. Huntley* .... 20
- Letters & Bibliography .... 22

#### **Number 2**

- The use of an image intensifier to study the TL intensity variability of individual grains  
*D.J. Huntley & J.J. Kirkey* .... 1
- Preliminary study of the thermoluminescence behaviour of quartz from a Dutch cover sand  
*J.W.A. Dijkmans & A.G. Wintle* .... 5
- An indication of universal linear variation of K<sub>2</sub>O percentage with beta dose rates  
in ceramics: preliminary results  
*Y. Liritzis* .... 11
- Comments on extrapolation methods of dating sediments by TL  
*N.C. Debenham* .... 17
- Further comments on extrapolation methods of dating sediments  
*Vagn Mejdahl* .... 21
- Letters & Notices .... 27
- Bibliography .... 28

**Number 3**

A correction procedure for ambient activation in pre-dose dating <i>S.R. Sutton &amp; C.M. Kornmeier</i>	.... 1
Problems with linear regression as applied to TL data <i>H.M. Rendell</i>	.... 6
TL studies of Quaternary sediments at the University of Gdansk <i>S. Fedorowicz &amp; I.J. Olszak</i>	.... 10
Cleaning chert with HF - a note <i>Christopher Maurer</i>	.... 14
Sensitization of TL signal by exposure to light <i>A.G. Wintle</i>	.... 16
Alpha particle effectiveness: numerical relationship between systems <i>M.J. Aitken</i>	.... 22
An automated beta irradiator using a Sr-90 foil source <i>D.C.W. Sanderson &amp; D.A. Chambers</i>	.... 26
Bibliography	.... 30

**Volume 4 , 1986****Number 1**

Beta dose attenuation in thin layers <i>R. Grün</i>	.... 1
A high performance TL disc <i>R. Templer</i>	.... 9
Post wash effects in zircon <i>S. Wheeler</i>	.... 10
Paleogeographical and stratigraphical inferences from TL properties of Saalian & Weichselian loess of NW Europe. <i>S. Balescu, C. Dupuis &amp; Y. Quinif</i>	.... 16
Bibliography	.... 24

**Number 2**

Linear regression of TL Data <i>G. W. Berger &amp; D. J. Huntley</i>	.... 26
Extrapolation errors in linear regression <i>A. D. Franklin</i>	.... 31
European Network on 'Thermoluminescence Applied to Archaeology' <i>V. Mejdahl &amp; I. K. Bailiff</i>	.... 36
Bibliography	.... 37

**Number 3**

Ancient TL Date List	.... 38
A caution on laboratory illumination <i>N. A. Spooner &amp; J. R. Prescott</i>	.... 46
Application of ESR to the dating of subfossil shells from marine deposits <i>A. Molodkov</i>	.... 49
Some remarks on fine-grain sample preparation for TL dating <i>Christian Goedicke</i>	.... 55
TL stratigraphy of loesses: quartz and feldspar dosimeters within loessic deposits from Normandy and France <i>S. Balescu, Ch. Dupuis &amp; Y. Quinif</i>	.... 61
Bibliography	.... 68

**Volume 5, 1987****Number 1**

Study of the effect of pre-annealing on sediment TL using a technique of glow curve analysis <i>N.C. Debenham</i>	.... 1
The effect of pre-annealing on sediment TL <i>A.G. Wintle</i>	.... 8
Kinetic studies of quartz thermoluminescence as applied to sediment dating <i>A.I. Shlukov &amp; S.A. Shakhovets</i>	.... 11
Bibliography	.... 16

**Number 2**

Some remarks on ESR dating of bones <i>Rainer Grün &amp; Henry Schwarcz</i>	.... 1
Internal radioactivity in quartz and feldspar grains <i>Vagn Mejdahl</i>	.... 10
Bibliography	.... 18

**Number 3**

Alpha dose to a thin layer <i>M. J. Aitken</i>	.... 1
Alpha effectiveness in ESR dating: a preliminary note on energy dependence <i>R.G. Lyons</i>	.... 4
Alpha dose attenuation in thin layers <i>Rainer Grün</i>	.... 6
Experimental TL techniques for the Inclusion method <i>A. D. Franklin, W. F. Hornyak &amp; A. Tschirgi</i>	.... 9
Bibliography	.... 11

**Volume 6, 1988****Number 1**

Recent addition of potassium: a potential source of error in calculating TL age <i>M.L. Readhead, R.C. Dunnell &amp; J.K. Feathers</i>	..... 1
A source of variability in the thermoluminescence of quartz <i>N. A. Spooner &amp; J. T. Hutton</i>	..... 5
Stopping power and range for alpha particles in SiO <sub>2</sub> <i>Georges Valladas</i>	..... 7
More cautions on laboratory illumination <i>B.W. Smith</i>	..... 9
Bibliography	..... 10

**Number 2**

A technique for the generation of three dimensional isometric glow curves from conventional glow curve records. <i>I.K. Kaul, S. SenGupta &amp; Tuhina Sanyal</i>	.... 12
Dose-rate comparisons of sands for thermoluminescence dating <i>A.G. Wintle &amp; J.W.A. Dijkmans</i>	.... 15
The Nucleus' PCA board - a review <i>D.J. Huntley</i>	.... 18
Bibliography	.... 19

**Number 3**

Irradiation of loess samples at elevated temperatures

*A.G. Wintle & S.C. Packman*

.... 22

Bibliography

.... 24

**Volume 7, 1989****Number 1**Alpha dose rate calculations in speleothem calcite: values of  $\eta$  and  $k_{\text{eff}}/k_{\text{ref}}$ *R. G. Lyons & B. J. Brennan*

.... 1

Fractional bleaching of potassium feldspar from sediments and its role in equivalent dose determination

*J.W.A Dijkmans & A.G. Wintle*

.... 5

A note on overcounting in alpha-counters and its elimination

*L.Zöller & E.Pernicka*

.... 11

110 °C TL peak records the ancient heat treatment of flint

*H.Y. Göksu, A. Weiser & D.F. Regulla*

.... 15

The use of LEDs as an excitation source for photoluminescence dating of sediments

*N.R.J Poolton & I.K. Bailiff*

.... 18

Bibliography &amp; Computer Column

.... 21

**Number 2**

The validity of the laboratory reconstruction of palaeodose

*G. Hütt & J. Jaek*

.... 23

Treatment of error in plateau values - caveat emptor

*Glenn W. Berger & D. J. Huntley*

.... 27

Significant peak enhancement of the natural TL signal observed after short term storage at 75 °C

*M. L. Clarke & A. G. Wintle*

.... 30

Ranges of alpha particles in various media

*B. J. Brennan & R. G. Lyons*

.... 32

Comparison between fine-grain and ultrathin TLD in the measurement of alpha dose-rate

*Wang Weida, Xia Junding, & Zhou Zhixin*

.... 38

Bibliography

.... 42

**Number 3**

Test data for exponential fits

*G.W. Berger & D.J. Huntley*

.... 43

A convenient method for preparation of fine-grain samples

*Wang Weida & Xia Junding*

.... 47

Infrared stimulated photoluminescence dating of sediments

*G. Hütt & J. Jaek*

.... 48

Bibliography

.... 52

**Volume 8, 1990****Number 1**

Regression analysis of exponential palaeodose growth curves

*V. Poljakov & G. Hütt*

.... 1

Bibliography

.... 3

*Supplement: Date List 3*

**Number 2**

Moisture correction for annual gamma dose <i>M. J. Aitken &amp; J. Xie</i>	.... 6
Notes on a recently constructed TL system <i>R. B. Galloway</i>	.... 10
Pairs precision required in alpha counting <i>M. J. Aitken</i>	.... 12
Bibliography	.... 15

**Number 3**

Some characteristics of infrared emitting diodes relevant to luminescence dating <i>N.A. Spooner &amp; M. Franks</i>	.... 16
Dose response of the paramagnetic centre at $g = 2.0007$ in corals <i>Rainer Grün</i>	.... 20
Regression and error analysis for a saturating-exponential-plus-linear model <i>G. W. Berger</i>	.... 23
Internal dose rates of quartz grains separated from fault gouge <i>Rainer Grün &amp; Clark Fenton</i>	.... 26
Isolation of the rapidly bleaching peak in quartz TL glow curves <i>A. D. Franklin &amp; W. F. Hornyak</i>	.... 29
Dating quartz sediments using the 325 °C TL peak: new spectral data <i>John R. Prescott &amp; P. J. Fox</i>	.... 32
Comment, Bibliography & Computer Column	.... 35
Notices	.... 36
<i>Supplement: Date List 4 (1990)</i>	

**Volume 9, 1991****Number 1**

Cosmic ray dose rate determination using a portable gamma-ray spectrometer <i>Andreas Bürgi &amp; Markus Flisch</i>	.... 1
Alternative laboratory illumination: 'gold' fluorescent tubes <i>R. B. Galloway &amp; H. J. Napier</i>	.... 6
Bibliography	.... 10
Computer Column	.... 11

**Number 2**

A cautionary note: apparent sensitivity change resulting from curve fitting <i>Sheng-Hua Li</i>	.... 12
ESR behaviour of the paramagnetic centre at $g=2.0018$ in tooth enamel <i>Edward J. Rhodes &amp; Rainer Grün</i>	.... 14
Zero thermoluminescence for zero age <i>J.R. Prescott &amp; R.A. Purvinskis</i>	.... 19
The hypothesis of mid-term fading and its trial on Chinese loess <i>J. Xie &amp; M.J. Aitken</i>	.... 21
Removal of the thermally unstable signal in optical dating of K-feldspar <i>Sheng-Hua Li</i>	.... 26
Notices & Bibliography	.... 30

**Number 3**

Improved detection of EPR signals used in quartz dating <i>W. Jack Rink &amp; Yuhei Shimoyama</i>	.... 33
The effect of optical absorption on luminescence dating <i>A.G. Wintle &amp; G.A.T. Duller</i>	.... 37
On the selection of dose points for saturating exponential ESR/TL dose response curves <i>Rainer Grün &amp; Edward J. Rhodes</i>	.... 40
The bleaching of latent optically stimulated luminescence <i>R. B. Galloway</i>	.... 47
Sensitivity changes of luminescence signals from colluvial sediments after different bleaching procedures <i>Sheng-Hua Li &amp; A.G. Wintle</i>	.... 50
Bibliography	.... 54
Notices	.... 56
<i>Supplement::</i> Date List 5 (1991)	.... 57

**Volume 10, 1992****Number 1**

Normalization of inclusion size quartz TL data <i>A.D. Franklin &amp; W.F. Hornyak</i>	.... 1
A device for centering samples in ESR measurement <i>R. G. Lyons</i>	.... 7
The use of a single aliquot method of intercalibration between radioactive sources <i>G.A.T. Duller</i>	.... 8
Comment on 'A cautionary note: apparent sensitivity change resulting from curve fitting' <i>E. Bulur &amp; A.Y. Özer</i>	.... 12
Symbols in TL and optical dating: provisional list <i>M. J. Aitken</i>	.... 15
Bibliography	.... 17
Notices	.... 18

**Number 2**

Infrared stimulation of quartz <i>M. A. Short &amp; D. J. Huntley</i>	.... 19
The effect of shallow traps: a possible source of error in TL dating of sediments <i>Vagn Mejdahl, A.I. Shlukov, S.A. Shakhovets, L.T. Voskovskaya &amp; H.G. Lyashenko</i>	.... 22
Bibliography & Notices	.... 26

**Number 3**

Observations on palæodose determination with burnt flints <i>N. Mercier, H. Valladas &amp; G. Valladas</i>	.... 28
TL dating in the Holocene using red TL from quartz <i>M. Montret, D. Miallier, S. Sanzelle, J. Faïn, Th. Pilleyre &amp; S. Soumana</i>	.... 33
Suggestions for minimum requirements for reporting ESR age estimates <i>Rainer Grün</i>	.... 37
Estimation of accumulated dose and its uncertainties: potential pitfalls in curve fitting <i>R.G. Lyons, B.J. Brennan &amp; P.L. Hosking</i>	.... 42
Simulations of saturating exponential ESR/TL dose response curves - weighting of intensity values by inverse variance <i>Rainer Grün &amp; Edward J. Rhodes</i>	.... 50
Bibliography & Letters	.... 57

## Volume 11 1993

## Number 1

Estimation of equivalent dose in thermoluminescence dating - the <i>Australian slide</i> method <i>J.R. Prescott, D.J. Huntley &amp; J.T.Hutton</i>	.... 1
Exponential regressions for TL/ESR using regenerated dose response curves <i>S. Sanzelle, J. Faïn, D. Miallier, M. Montret &amp; Th. Pilleyre</i>	.... 6
Uncertainties involved in the measurement of TL intensities <i>Rainer Grün &amp; Susan C. Packman</i>	.... 14
A model for mid-term fading in TL dating <i>W. Hornyak, A. Franklin &amp; R. Chen</i>	.... 21
Selective bleach: an improved partial bleach technique for finding equivalent doses for TL dating of quartz sediments <i>J.R. Prescott &amp; B. Mojarrabi</i>	.... 27
Bibliography & Notices	.... 31

## Number 2

A model for sensitivity change of IRSL signals <i>Sheng-Hua Li &amp; A.G. Wintle</i>	.... 33
High sensitivity TL spectra of quartz and feldspar <i>P.D. Townsend, H.M. Rendell &amp; B.J.Luff</i>	.... 36
Important date/strange material <i>R. Kaylor, J. Feathers, M. Gottfried, W. F. Hornyak &amp; A. D. Franklin</i>	.... 40
Collection of ESR samples from the interior of mammoth teeth causing minimal damage <i>Rainer Grün &amp; Adrian Lister</i>	.... 45
Cautions on the use of extended duration preheats in the optical dating of quartz <i>Richard G. Roberts, Nigel A. Spooner &amp; Danièle G. Questiaux</i>	.... 47
Bibliography & Letters	.... 55
